Education

ISL ENGINEERING COLLEGE

Bachelor of Science in Computer Science

Hyderabad, India

Dec 2020 - April 2024

Experience

Front End Developer

May 2023 - July 2023

Code-Linear - Remote

- Spearheaded the design of **visually appealing** and intuitive web interfaces, utilizing **HTML, CSS, JavaScript, React and Tailwind CSS**, resulting in a **20% improvement in user engagement**.
- Collaborated seamlessly with **cross-functional** teams of designers and developers, **optimizing website performance and achieving a 15% increase in overall site** responsiveness.
- Led initiatives to exceed project expectations, resulting in the **successful delivery of 10+ high-performance and user-centric websites** within project timelines.

Teaching Assistance

March 2023 - July 2023

Coding ninjas- Remote

- As a teaching assistant in **data structures and algorithms (DSA)** for **C++**, I prioritize ensuring students' strong conceptual understanding. Mentored over **150** students in DSA and **problem-solving**, successfully resolving **350+** doubts with an average rating of **4.9**, showcasing my effective teaching abilities.

Projects

Pg-management | [Live-site](#) | [GitHub](#)

- Led the development of PG Management, a **Sass platform** for PG owners, demonstrating **end-to-end project** leadership and technical expertise. Built on the **MERN stack** and **deployed using Digital Ocean**.
- Implemented **dual-layered authentication (admin and user logins)** with email and password protocols. Engineered **real-time updates** for seamless tenant management, complemented by a **user-friendly UI**.
- **Advanced search** and floor number **filtering** for efficient tenant management. Developed a dedicated **history page** for comprehensive tenant overviews and month-wise histories, **supporting data-driven decision-making**.

Quillify | [Live-site](#) | [GitHub](#)

- Successfully built a cutting-edge **MERN stack blog WebApp**, "Quillify," showcasing expertise in full-stack development. Excited to present a platform that seamlessly integrates **creativity and functionality**.
- Implemented a **feature-rich text editor**, ensuring an elevated writing experience for users, and seamlessly integrated **CRUD operations**, demonstrating proficiency in content management.
- Engineered a **privacy-focused system**, allowing creators exclusive access to secure **update and delete options**. Each blog post is **uniquely associated with its creator's name**, enhancing user engagement and personal connection within the platform.

Bookpedia | [Live-site](#) | [GitHub](#)

- Conceptualized and developed "Bookpedia," an e-commerce platform leveraging **Google Book API** for an extensive collection. Using **React Router DOM and Redux Toolkit** for seamless navigation and robust state management.
- Introduced unique features like a **"Favorite" section** for users to curate personal libraries and a dedicated **"Best-selling" section** for staying updated on literary trends.
- Added a **secure payment**, ensuring seamless transactions. Combined cutting-edge tech with **user-centric design** for an enjoyable book discovery journey, showcasing a commitment to user satisfaction.

Technical Skills

Languages : C, C++, HTML, CSS, JavaScript

Frameworks/Library's : React JS, React Native, Next.JS, Node JS, Express JS, Type-Script, Material-UI, Tailwind CSS.

Developer Tools : Git, Firebase, MongoDB, VS Code, Digit Ocean

Course Works: Data Structures and Algorithms, DBMS, Operating System, Computer Networks

Achievements and Leadership Skills

- Completed **Hacktoberfest 2022** with **15+ Pull Request** in that **15+** got **merged successfully**
- Came in top **20** of **Hack In-vision** Hackathon organized by Muffakham Jah College
- Solved around **500+** DSA question on various platform like **gfg, leetcode, code chef, codeforces**.
- **5 start** on **Hacker rank** and **2 start** on **Code chef**
- Came in top **30** of **Hack Revolution** Hackathon organized by Nawab shah alam college
- Helping my junior to **kick-start** web development journey by conducting **webinar's** and **Hackathon's**
