Education

ISL ENGINEERING COLLEGE

Bachelor of Science in Computer Science

Hyderabad, India

Dec 2020 - June 2024

Experience

Software Developer Full Time - Airia - Remote

Jul 2024 - present

- Spearheaded developing front-end interfaces for **three different** applications using **JavaScript, Go, and Python**, ensuring **seamless integration** with back-end services and enhancing **user engagement** by **20%** through improved interactivity and deploying the applications on **Docker and AWS**.
- Architected and implemented front-end solutions across three applications, focusing on **pixel-perfect** designs, which **streamlined** the application process, leading to a **resulting** in a **robust, scalable** applications.

Software Developer Intern - Texpr-AI - Remote

Feb 2024 - Jun 2024

- Developed the **entire frontend** of a web application using React.js, Next.js, and MUI, leading to a **20%** improvement in loading times by adhering to best practices and industry standards and created a **fully functional blog** using Strapi
- Boosted user engagement by **10%** through the integration of Apex and React charts, ensured **pixel-perfect** efficiently integrated **15+ APIs** implementation of **25+** Figma designs.

Front-End Developer Intern - Code-Linear - Remote

May 2023 - July 2023

- Designed visually appealing web interfaces, leading to a **5%** increase in user engagement **responsiveness** by **15%**
- Enhanced web application performance performance, decreasing page load times by **5%** and improving user engagement.

Projects

Pg-management | [Live-site](#) | [GitHub](#)

- Led development of a **SaaS** platform for PG owners using the **MERN stack**, incorporating **dual-layered authentication, real-time updates**, and **advanced search** with floor number **filtering**.
- Deployed on **DigitalOcean**, ensuring **scalability and reliability** for seamless user access and optimized tenant.

Holiday | [Live-site](#) | [GitHub](#)

- Developed a holiday booking platform using the **MERN stack** with **TypeScript**, featuring advanced **search filters** and detailed hotel pages with image uploads via **Cloudinary**.
- Integrated **Stripe payment** gateway for secure transactions, demonstrating expertise in modern web development.

Bookpedia | [Live-site](#) | [GitHub](#)

- An e-commerce platform using **SaaS Google Books API**, with **React Router DOM** and **Redux Toolkit** for seamless navigation and state management, featuring **"Favorite"** and **"Best-selling"** sections.
- Integrated **secure payment** transactions, focusing on a **user-centric** design for an enhanced book discovery experience.

Technical Skills

Languages : C, C++, HTML, CSS, JavaScript

Frameworks/Libraries: ReactJS, NextJS, NodeJS, ExpressJS, Typescript, Material-UI, Tailwind CSS

Developer Tools: Git, Docker, MongoDB, VS Code, Digital Ocean and AWS

Coursework: Data Structures and Algorithms, DBMS, OOPs

Achievements and Leadership Skills

- Completed Hacktoberfest 2022 with **15+** pull requests, with all successfully merged.
- Ranked in the **top 20** in Hack In-vision Hackathon and **top 30** in Hack Revolution Hackathon
- Solved around **500+** DSA questions on platforms like GeeksforGeeks, LeetCode, CodeChef, Codeforces.
- Achieved **5-star** rating on HackerRank and **2-star** rating on CodeChef.
- Conducted **webinars and hackathons** to **mentor juniors** in kick-starting their web development journey.
