Experience

Software Engineer - Inncircle's   Feb 2025 - Present

- Implemented **real-time** internal error alerting using **AWS CloudWatch** and **Slack integrations**. Created a **priority system** (High: 5 mins, Medium: 30 mins, Low: 6 hrs) for timely developer alerts, reducing issue **response time by 20%** and improving internal **monitoring**.
- Enhanced the login system with **multi-session** support for web and mobile platforms, enabling secure login, logout, and refresh token workflows across all devices, resulting in a **10%** improvement in user experience and session reliability.
- Led payment module upgrade to support **multi-transaction** flows via Cheque and NEFT, and optimised filter performance on **800,000+ records**, achieving a **3x faster query response** and smoother **user experience on large datasets.**

Software Engineer - DrCode.ai   Jul 2024 - Feb 2025

- Developed an **AI-powered code review system**, enhancing **code quality by 5%** and boosting developer **efficiency by 25%** through real-time pull request analysis, feedback generation, and automated issue resolution .
- Built an AI-driven testing tool and VS Code extension for **automated API testing** with AI-generated test cases, **improving API robustness by 12%** andreducing manual **testing time by 8%.**
- Led the platform pivot from **AI search to code review**, driving R&D on developer tooling, AWS/Docker deployment, and **cross-team integrations**, resulting in a **5% increase in adoption** and better uptime.

Software Developer Intern - Textr-AI   Feb 2024 - Jun 2024

- Improved the **entire frontend** of a web application using **React.js, Next.js, and MUI**, achieving a **20%** improvement in loading times and building a **fully functional blog** with Strapi.
- Boosted user engagement by **10%** through the integration of **Apex and React charts**, efficiently implemented **15+ APIs**, and ensured **pixel-perfect execution** of **35+ Figma designs**.

Front-End Developer Intern - Code-Linear   May 2023 - July 2023

- Designed visually appealing web interfaces, leading to a **5%** increase in user engagement **responsiveness** by 15%
- Refined **web application performance**, reducing page load times by **5%** and boosting **user engagement**.

Technical Skills

Languages : C, C++, HTML, CSS, JavaScript, and Python
Frameworks/Libraries: ReactJS, NextJS, NodeJS, ExpressJS, Typescript, Material-UI, Angular and Tailwind CSS
Developer Tools: Git, Docker, MongoDB, VS Code, Digital Ocean and AWS
Coursework: Data Structures and Algorithms, DBMS, OOPs

Projects

Pg-management | Live-site | GitHub

- Spearheaded the development of a **SaaS platform** for PG owner. integrating **dual-layered authentication**, **real-time updates** & **advanced search functionality** with floor-based **filtering**, improving tenant search efficiency by **30%**.
- Deployed the platform on **DigitalOcean**, ensuring **99.9% uptime** and **scalability** to support over **10+ users** with seamless user and tenant interactions.

Education

ISL ENGINEERING COLLEGE   Hyderabad,India
Bachelor of Science in Computer Science   *July 2020 - June 2024*

Achievements and Leadership Skills

- ＊ Ranked in the **top 3** in Hack In-vision Hackathon and **top 5** in Hack Revolution Hackathon
- ＊ Solved around **500+** DSA questions on platforms like GeeksforGeeks, LeetCode, CodeChef, Codeforces.
- ＊ Completed Hacktoberfest 2022 with **35+** pull requests, with all successfully merged.
- ＊ Achieved **5-star** rating on HackerRank in Problem sloving and **2-star** rating on CodeChef.
- ＊ Conducted **webinars and hackathons** to **mentor juniors** in kick-starting their web development journey.
